JORDAN MONTERO

SOFTWARE ENGINEER

I am an innovative Software Engineer with a passion for problem-solving that drives me to create high quality applications that are instinctively user-friendly. I work well on a team, yet I'm a motivated self-starter and quick learner. My degree in Psychology gives me insight into human behavior, enabling me to work well with all personality types and form strong relationships with peers, coworkers, and clients. Years of work in the restaurant industry honed my strong people-facing skills and gave me experience in a fast-paced environment. I've been commended for my impressive work ethic and look forward to applying it at a high-achieving and supportive company as a Software Engineer.

SKILLS

SOFTWARE DEVELOPMENT
HTML, CSS, Javascript, jQuery, Node.js, React, Axios, Express, SQL, PostgreSQL, Ruby, Ruby on Rails, Git, Github, Airtable, Heroku, Netlify, Surge

PROJECTS

FRESH TOMATOES:
Inspired by Rotten Tomatoes, this application provides users with a variety of movies added In by users. Users may leave reviews and ratings on movies to retrieve an average audience score for each movie.

GROUP RUN:
Application that allows users to enter and keep track of their run data. Enter Info such as the distance, time, and calories burned.

IMA MIRU
Translating to "Watch now" In Japanese, this app lets users browse various anime shows. Users with an account may add shows that they like to their personal "watchlist" via association.
